

Fatal Wave Classic

"Sharp turns on the curl"

Program: WAVE PRO

Two brand new shapes developed with the help of Abel Lago, our wave specialist, tested throughout the whole wave world tour season. Precise, fast and radical kitesurfboards that combine the latest development in boards designs with a state of the art composite technology, mixing the "surfmagic" of PU foam and polyester resin with hi-density sandwich heels reinforcements.

The **Fatal Wave Classic 5'8"** it's a shape developed for smaller waves, the fins are in a back position compared to the **Fatal Wave Classic 6'0"**, which is a board developed to have the top performances in bigger waves, so with an higher board speed.

The Fatal Wave Classic it's available also in two other different constructions:
X-Tech Technology (EPS/Wood/Glass/GC Polished sandwich), same sandwich construction used to made Fatal Wave Sandwich boards. The Fatal Wave X-Tech have the same shape of Fatal Wave Classic boards, but are lighter, stiffer and stronger.

Wood Technology (Wood Veneers sandwich) construction makes boards even stronger, and much more stylish!
